

THANT HTET OO

Senior Cybersecurity Engineer

Canterbury, UK | +44 735 216 2033 | thanthtetoo@gmail.com
[linkedin.com/in/thanthtetoo](https://www.linkedin.com/in/thanthtetoo) | github.com/feniz24

PERSONAL INFORMATION

Date of Birth:	24/04/1998
Age:	28
Nationality:	Burmese
Visa / Work Permit Status:	Need Sponsorship

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on defensive engineering experience spanning endpoint security tooling (EPP, EDR, NDR, XDR), SIEM operations, deception technology, and security automation, complemented by an MSc Cyber Security in progress (University of Kent). Blue Team Level 1 (BTL1) certified with a Top 1% global ranking on TryHackMe. Experienced deploying, tuning, and administering security tools (XDR, SIEM, deception, web content filtering) and mapping detections to the MITRE ATT&CK framework. Built Python-based automation and SOAR playbooks to speed up alert triage, threat remediation, and reporting. Cloud security exposure across AWS (IAM, VPC, CloudFormation) and Azure, with Certified Kubernetes Administrator (CKA/CKAD) credentials. Comfortable with system, network, and endpoint hardening, vulnerability management, and translating technical findings for non-technical stakeholders. Seeking a Cybersecurity Defensive Engineer role to operate and mature production cyber-defense infrastructure.

CORE COMPETENCIES

- Security Engineering & Operations:** EDR/Endpoint Security Deployment & Tuning, SIEM Administration, Deception Technology, Web Content Filtering, Incident Response, Threat Hunting, Alert Triage & Investigation, MITRE ATT&CK Mapping, Vulnerability Management, Patch Management, Malware Analysis (fundamentals)
- Security Tools & Platforms:** Wazuh, Cynet (XDR), Splunk, IBM QRadar, Sysmon, Nessus, Wireshark, Nmap, Burp Suite
- Hardening & Risk:** System/Network/OS Hardening (least privilege, service reduction, password policy, segmentation, logging), Security Configuration Management, Information Security Risk Assessment fundamentals
- Cloud & DevOps:** AWS (EC2, S3, IAM, VPC, CloudFormation), Microsoft Azure, Kubernetes (CKA/CKAD), Terraform, Docker
- Automation & Scripting:** Python (Pandas, NumPy, Selenium, Flask), SOAR Playbook Development, API Integration, Bash
- Query Languages:** KQL (Kusto Query Language), SQL
- Documentation:** Security runbooks, SOP documentation, host security reporting, technical writing for technical and non-technical audiences
- Operating Systems:** Windows, Linux (Kali, Ubuntu)
- Languages:** Burmese (Native), English (Proficient)

PROFESSIONAL EXPERIENCE

Senior Cybersecurity Engineer - Apex Edge Technology

July 2025 - Current

- Deployed, configured, and administered EPP/EDR/NDR + XDR agents across Windows and Linux (Ubuntu) endpoints & servers.
- Ran controlled adversary simulations (SSH/RDP brute-forcing, reverse shells, PowerShell Empire) to validate EDR, deception, and web-content-filtering coverage, then tuned detection rules and whitelist/blacklist to cut false positives.
- Built and deployed SOAR playbooks for automated threat remediation, including file quarantine and malicious-file autodeletion, reducing manual alert-triage effort.
- Developed Python scripts and API integrations to automate alert tracking, generate security metrics, and produce host security reports for stakeholders.
- Performed active threat hunting and alert investigation, and validated Windows patch compliance as part of ongoing vulnerability/patch management.
- Produced monthly reports on alerts, incidents, and cyber threat intelligence for customer stakeholders, summarizing detection trends and remediation outcomes.
- Managed administrative rights and user privilege assignments across monitored endpoints, applying least-privilege principles to reduce attack surface.
- Supported digital forensics activities by examining suspicious software and monitoring its behavior to assess intent and impact.

TECHNICAL PROJECTS

Personal Security Operations Center (SOC) Home Lab - Wazuh, HELK, Sysmon, Ubuntu, Windows

- Deployed and configured Wazuh SIEM on Ubuntu Server to monitor a Windows 11 endpoint, integrating Sysmon for enriched telemetry and event-log parsing.
- Experimented with HELK (Hunting ELK) to explore Elasticsearch-based log aggregation and querying as an alternative threat-hunting stack alongside Wazuh.
- Simulated and detected live attacks (e.g., RDP brute-force) to validate custom detection rules, mapping alerts to MITRE ATT&CK for standardized threat coverage.
- Conducted vulnerability assessments and prioritized patch management based on findings.

Cloud Infrastructure Security - AWS re/Start Projects

- Architected secure VPCs with public/private subnet isolation and IAM role-based access control; automated secure resource deployment with CloudFormation (IaC).
- Configured CloudWatch alarms to monitor system health and detect unauthorized access attempts, applying core system/network hardening and monitoring principles.

Automation & API Security Development

- Developed Python/Selenium scripts to automate web interactions and data collection for security tasks.
- Built a Flask-based authentication service implementing JWT to secure user sessions.

EDUCATION

MSc Computer Science (Cyber Security) - University of Kent

Expected Sep 2026

Focus: Digital Forensics, Cybercrime, Privacy, Computer Systems

BA Business Administration - University of Hertfordshire

Foundational coursework in business risk, operations management, and organizational strategy

CERTIFICATIONS

- **Defensive Security & Operations:** Blue Team Level 1 (BTL1) (2026); Cynet Certified T1 Support Engineer (CCSE) (2026); Cynet Certified Technical Partner (CTP) (2026); CompTIA Security+ (2025); Certified SOC Analyst -Level 1, M.S.T College (2024); Google Cybersecurity Professional Certificate (2024)
- **Cloud & Infrastructure:** Certified Kubernetes Administrator (CKA) (2026); Certified Kubernetes Application Developer (CKAD) (2026); AWS Certified Cloud Practitioner (2025)
- **Data & AI:** Microsoft Azure AI Fundamentals (AI-900) (2024); IBM Data Science Professional Certificate (2023); Google Data Analytics Certificate (2022)

ADDITIONAL ACHIEVEMENTS

- TryHackMe - Top 1% Global Ranking: completed 100+ practical labs in network security, privilege escalation, and web application vulnerabilities.
- ASEAN Youth for Digital Action, Participant (2025)
- Machine Learning Paper Reading Club - W.A.I Myanmar, Member (2024)
